14. ABSTRACT The 1999 Active Duty Surveys (ADS) gather information on current location, spouse's military assignment, military life, programs and services, spouse employment, family information, economic issues, and background. This report provides tabulated results obtained from spouses of active duty members. Survey results are tabulated for DoD as a whole and for subgroups defined by member Service, paygrade category, location, and respondent gender. Background information, survey administration, and analytical procedures are also briefly discussed in chapters of this report.

Acknowledgments

DMDC is indebted to numerous people for their assistance in the design of these surveys. In the initial design stage, we convened a group of subject matter experts within the Office of the Under Secretary of Defense for Personnel and Readiness to discuss desirable elements for the survey. Those who participated had the opportunity later to review and provide comments on the survey outline developed at the meeting as well as throughout the design phase. We also wish to thank the General Accounting Office (GAO) who assisted in the conduct of pretests and offered helpful suggestions as the instrument underwent revisions. Among those contributing were Jack Edwards, John Pendleton, Kurt Burgeson, and William Buesse. We especially thank Edward Akers (Consortium Research Fellows Program), Tanya Guthrie, Robert O. Simmons, and Jacqueline S. Randolph (Defense Manpower Data Center) for facilitating pretests and helping with question design.

Data collection and dataset preparation for the *1999 Survey of Active Duty Personnel (Form A)*, and the *1999 Survey of Spouses of Active Duty Personnel (Form B)* were performed by Data Recognition Corporation (DRC) under contract DASW01-98-C-0062. Contributing staff at DRC in the Survey Division include the Federal Government Team (Mary Latta, Heidi Koelker, Dawn Nelson, Michelle Tostenson, and Mary Ellen Hartmann). They were supported at DRC by the staffs of Comment Processing, the Call Center, Survey Operations, Clerical Operations, Print Services, Inserting, and Warehousing.

Data processing and production of these tabulation volumes were performed by Westat under contract M67004-98-D-002. Contributing staff at Westat include, Mary Ann Deak, David Rockwell, Christine Gaines, Katie Hubbell, and Amita Gopinath. They were supported at Westat by Dawn Williams.

Many people contributed to the review of this report. We are grateful to Rachel Noble and Elizabeth J. Willis (Consortium Research Fellows Program) for their attention to detail.

1999 SURVEY OF SPOUSES OF ACTIVE DUTY PERSONNEL: TABULATIONS OF RESPONSES, VOLUMES 1 & 2

Preface

The 1999 Active Duty Surveys (ADS) continues a line of research begun in 1969 with a series of small-scale surveys administered approximately every two years. These surveys were expanded in 1978 to provide senior Department of Defense (DoD) officials with information about military members and spouses (Doering, Grissmer, Hawes, and Hutzler, 1981). The DoD also conducted large-scale surveys of active-duty members and spouses in 1985 (Hunt et al., 1986) and 1992 (Westat, 1993, 1994a, 1994b). The 1999 ADS are a set of mail surveys sponsored by the Office of the Assistant Secretary of Defense for Force Management Policy (OASD[FMP]) with particular interest in analysis by the Offices of the Deputy Assistant Secretaries of Defense for Military Community and Family Policy (ODASD[MCFP]) and for Military Personnel Policy (ODASD[MPP]).

There are two 1999 ADS instruments: the *1999 Survey of Active Duty Personnel (Form A)*, and the *1999 Survey of Spouses of Active Duty Personnel (Form B)*. Spouses' responses to *Form B* are provided in two volumes (Deak et al., 2001a, 2001b). Members' responses to *Form A* were presented in two earlier volumes (Gaines, Deak, Helba, and Wright, 2000a, 2000b). Tabulation volumes were also done for the 1985 surveys (Griffith, LaVange, Gabel, Doering, and Mahoney, 1986a, 1986b, 1986c; LaVange et al., 1986a, 1986b, 1986c).

Survey Methodology

Survey Design

Both *Form A* and *Form B* are constructed around a set of core questions comparable to those used in previous surveys of DoD members and spouses, particularly the *1992 DoD Surveys of Officers and Enlisted Personnel and Their Spouses*. The questionnaires focus on the experiences, attitudes, and demographic characteristics of active duty members and their spouses. Like their predecessors, the 1999 ADS were designed to provide timely, policy-relevant information on the military life cycle (Wright, Williams, and Willis, 2000a, 2000b). These surveys also provide information on the impact of

military policies on the family, career intent, and factors affecting readiness, among other topics.

A copy of the 20-page, 112-question questionnaire is provided in the Appendix. The survey instrument can be grouped into eight sections:

- *Current Location* – includes questions on current location, accompaniment of respondent to member's permanent duty station (PDS), current residence, satisfaction with characteristics of current residence, and permanent change of station (PCS) moves;
- *Spouse's Military Assignment* – includes questions on member's PDS, Service, paygrade, time served, hours worked, and time away from the PDS for military duties;
- *Military Life* – includes questions on civilian vs. military opportunities for respondent and member, volunteer work, satisfaction with aspects of military service, relationships in the military community, and overall satisfaction;
- *Programs and Services* – includes questions on the availability and use of on-base and off-base services, facilities, and programs;
- *Employment* – includes questions on spouse's employment status, current primary job, reasons for working, problems in looking for or holding a job, category of job or business, and number of weeks and hours worked;
- *Family Information* – includes questions on current marital status, dependents, childcare arrangements, and military health care;
- *Economic Issues* – includes questions on non-military income, total monthly income and expenses, and savings and debt; and
- *Background* – includes information on gender, age, education, citizenship, and race/ethnic status.

Volume 1 of the tabulations covers the first three sections of the survey; Volume 2 of the tabulations covers the remaining five sections of the survey.

Sample Design

The population of inferential interest for *Form B* consisted of all spouses of active-duty Army, Navy, Marine Corps, Air Force, and Coast Guard members (including Reservists on active duty) below the rank of admiral or general, with at least 9 months of active duty service at the time of survey mailings. The sample frame included only those married members who were on active duty in May 1999, with eligibility conditional on also being on active duty in November 1999. Complete details of the survey development, sampling, administration, and dataset creation are reported by Wright, Williams, and Willis (2000b) and Wright, George, Flores-Cervantes, Valliant, and Elig (2001).

Sampling for the spouse survey was independent of the sampling for the member survey. The sample consisted of 38,901 spouses of members. A total of 16,103 eligible spouses returned usable surveys. This represents an adjusted weighted response rate of 51%, which is typical for large-scale surveys of DoD military members and spouses. The data were weighted to represent the married military population as of November 1999, the start of the data collection. Complete details of response rates and weighting are reported in Flores-Cervantes and Valliant (2001).

Survey Administration

The survey forms were administered to a stratified random sample of spouses of active-duty military members. Data were collected by mail with procedures designed to maximize response rates. Beginning in late September 1999, an introductory letter explaining the survey and soliciting cooperation was sent to spouses. The introductory letter was followed about 8 weeks later by a package containing the questionnaire and instructions for completing and returning the survey. A third letter was sent to thank individuals who had already returned the questionnaire and to ask those who had not completed and returned the survey to do so. At approximately 4 weeks, 7 weeks, and 11 weeks after the initial survey mailing, second, third, and fourth questionnaires with letters stressing the importance of the survey were mailed to individuals who had not responded to previous mailings. The field closed on April 17, 2000.

Analytic Procedures

Estimation Procedures

The 1999 *Survey of Spouses of Active Duty Personnel* used a complex sample design that required weighting to produce population estimates. This weighting means that standard statistical software packages may be inappropriate for computing standard errors, variances, or tests of statistical significance. For this report, variance estimates were calculated using WesVar,¹ a software application specifically designed to provide valid statistical estimates for complex surveys. WesVar uses replication methods for variance estimation.²

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the random variation around population parameters such as a percentage or mean. Estimates in these tabulations are percentages and are reported with 95% confidence intervals.

Percentages in these tabulations have Wilson upper/lower limit confidence intervals, which are asymmetric (Wilson, 1927; Newcombe, 1988). The Wilson confidence interval sets a lower bound of 0% and an upper bound of 100%. This means that, if the lower symmetric confidence interval for a small percentage would normally include a negative number, the lower Wilson confidence interval cannot go below 0. Likewise, if the upper symmetric confidence interval for a large percentage would exceed 100% using the standard approach, the Wilson method limits the upper interval to 100.

Subgroups

Survey results are tabulated in these reports for DoD as a whole and for subgroups defined by member Service, paygrade category, location, and respondent gender. Analyses assigned respondents to categories within subgroups primarily through answers provided on the survey. In the case of

¹ WesVar[®] is a registered trademark of Westat, Rockville, MD, USA.

² Replication is an empirical method of establishing sample variation by drawing repeated subsamples from the obtained sample and comparing results to those obtained for the full sample. This empirical calculation of variance is in line with the theory of sample variation, which draws upon the concept of creating repeated samples to establish confidence intervals. Replication methodology produces variance estimates very close to those produced using Taylor series linearization methodology, the main alternate method of variance estimation.

missing data on member Service, paygrade, location, or respondent gender data were completed using member's administrative records.

Subgroups were constructed as follows:

- Service is defined by the response to Q16, "In what Service is your spouse?" Observations are assigned to one of five categories: Army, Navy, Marine Corps, Air Force, or Coast Guard.
- Paygrade is based on Q17, "What is your spouse's current paygrade?" The original 20 categories are collapsed to seven for analyses: E1-E3; E4; E5-E6; E7-E9; W1-W5; O1-O3; and O4-O6.
- Gender is obtained from Q103, "Are you: (1) Male (2) Female," and is coded accordingly.
- Location is defined by responses to Q12, "Where is your spouse's permanent duty station located?" Observations were assigned to one of two categories: In one of the 50 States or the District of Columbia; or In American Samoa, Guam, U.S. Virgin Islands, Puerto Rico, or Overseas.

Clarity of Referencing Members and Spouses

In these tabular volumes, the term 'spouse' refers to the survey respondents who are all spouses of military members. To maintain clarity, original survey questions and response options that used the word 'spouse' to refer to the military member are modified to explicitly include a reference of "member". For example, in Table 35q.1, the question text was modified as follows, "How satisfied are you with each of the following aspects of your spouse's [member's] military job?: Your spouse's [member's] personal workload".

Constructed Variables

Tabulations in these volumes generally present data for individual survey items. The two exceptions are constructed scales for race ethnicity and employment status. The race and ethnicity questions were combined and are reported in accordance with U.S. Office of Management and Budget Bulletin 00-02 (2000) guidance for aggregation and allocation of multiple race responses for use in civil rights monitoring and enforcement. Several employment questions (40-46) were combined to create an employment rate. The Bureau of Labor Statistics reports an employment rate that excludes those in the Armed Forces. These tables analyze the employment rate but include Armed Forces in the calculation. The constructed variable maximizes the comparability from a military sample to national employment data while taking full advantage of all available data within the dataset.

Data Suppression

Unstable estimates based on a small number of observations or large variance in the data or weights were suppressed or annotated. The following rules were used:

- A cell estimate was not published if the size in that cell was less than 30. These cells are annotated "NR" (Not Reported).
- A cell estimate was published with an asterisk if the responding cell size is 30 to 59.
- A cell estimate was published with an asterisk if the relative standard error for that estimate was greater than 30%.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 U.S.C. 136, 10 U.S.C. 1782, and 10 U.S.C. 2358

PRINCIPAL PURPOSE: Information collected in this survey will be used to assess attitudes and perceptions of military life. This information will assist in improving policies and programs that benefit military families.

ROUTINE USES: Reports will be provided to the Secretaries of Defense and Transportation, and each Military Service. Findings will be used in reports and provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

THIS IS NOT A TEST, SO TAKE YOUR TIME.

SELECT ANSWERS THAT BEST FIT YOU.

MARK ONLY ONE ANSWER FOR EACH QUESTION
UNLESS THE QUESTION SAYS TO MARK ALL THAT APPLY.

- MAKE HEAVY BLACK MARKS THAT FILL THE RESPONSE CIRCLES.
- DO NOT MAKE ANY MARKS OUTSIDE OF THE RESPONSE CIRCLES OR WRITE-IN BOXES.
- IF YOU CHANGE YOUR MIND, ERASE OLD MARKS COMPLETELY.
- DO NOT USE INK, BALL-POINT, OR FELT TIP PENS.
